

The Cosmos: Astronomy in the New Millennium

By Jay M. Pasachoff, Alex Filippenko

CAMBRIDGE UNIVERSITY PRESS, United Kingdom, 2013. Paperback. Book Condition: New. 4th Revised edition. 277 x 239 mm. Language: English . Brand New Book. An exciting introduction to astronomy, the fourth edition of this book uses recent discoveries and stunning photography to inspire non-science majors about the Universe. Written by two highly experienced and engaging instructors, each chapter has been fully updated, with more than 200 new images throughout, including recent images from space missions and the world's best observatories. The newly redesigned text is organized as a series of stories, each presenting the history of the field, the observations made and how they fit within the process of science, our current understanding and what future observations are planned. Math is provided in boxes and easily read around, making the book suitable for courses taking either mathematical or qualitative approaches. New discussion questions encourage students to think widely about astronomy and the role science plays in our everyday lives and podcasts for each chapter aid studying and comprehension.

Reviews

Absolutely among the finest book we have at any time read through. We have read through and that I am sure that I will go to read once more again later on. I found out this book from my mom and dad suggested this book to find out.

I actually started reading this article ebook. It is actually packed with knowledge and wisdom. It's been printed in a remarkably simple way and it is only after I finished reading this pdf where in fact it modified me, altered the way I believe.
