Date :2011-01-18 version 1. This book is based on the latest Ministry of Education promulgated the engineering materials and machinery basic courses teaching basic requirements and the combination of our colleges and universities over the years reform experience of teaching written. The book's basic knowledge of engineering materials the main line to the selection of engineering materials focus on the theory and practice to enhance the training. for China and the actual development needs. to strengthen the proportion of new material selection. focusing on application type training. The book includes: engineering material properties. the crystal structure of metals and alloys and the binary alloy phase diagram. heat treatment of metals. industrial steel and cast iron. non alloy and powder metallurgy materials. polymers. inorganic and composite materials. and construction materials reasonable choice and so on. This book can serve as undergraduate engineering colleges. vocational and adult education institutions and other levels of GM material. but also for teachers and students and other relevant professional engineering and technical officers. Contents: Preface Introduction Chapter 1 the basic requirements of the teaching engineering material properties at 1.1 static mechanical properties of the material strength and plasticity 1.1.1 1.1.2 1.1.3 elasticity and stiffness of the material hardness of 1.2 when the dynamic load impact toughness mechanical properties 1.2.1 1.2.2 Fatigue 1.3 Engineering materials. physical. chemical and technological properties 1.3.1 Physical and chemical properties 1.3.3 1.3.2 thinking process performance problem Chapter 2 of the crystal structure of metals and alloys and the binary alloy phase diagram teaching the basic requirements 2.1 The crystal structure of metal crystals 2.1.1 2.1.2 The concept of the actual crystal structure of metal..
